February Newsletter

Dear Members,

Last week we had our first Hands-on night of 2023, and the new lathe stand was finally put to use with some practice pieces.

After Gary Rance's demo last month, Charlie suggested we try our hands at turning a Tippee Top and a couple of Members proceeded to make one under Charlie's expert guidance.

This theme for this month's competition was "Green turning" and several Members brought along their entries for judging:

Next month's meeting will be a Hands-on evening and the theme for the competition is a "Form in Black". I look forward to seeing what you all bring along for exhibition.

Dan
